

SELF-SERVICE FOR YOUR CAFÉ

Consumers are used to using self-serve kiosks to browse menus, look for deals and new dishes, and to order / pay.

Offering live and pre-programmed content, our 'BROWSE > SELECT > ORDER > PAY' terminals are providing customers with a choice on how they order and a frictionless experience, which delivers an improved average spend and product margin mix.

Providing more choice, reducing queues and increasing kitchen capacity, our complete 'BROWSE > SELECT > ORDER > PAY' terminals can be found in a leading supermarket's cafés throughout the UK.

We offer a wide range of interactive touch screens, payment terminals and kitchen management systems. Our screens can be floor, wall or table mounted, with single or double-sided options available.

Your self-service and automated technology specialists, providing happier, higher spending shoppers and lower operational costs.
