

LOSS PREVENTION: SECURE ENTRANCE

Gates and security systems can help to deter the shrinkage caused by shoplifting and petty thefts, whilst improving customer flow.

Our automatic gates provide you with a choice of gate styles, as well as various entrance functions and control mechanisms to meet individual store operational and physical requirements.

All of our automatic gates can be configured to be closed, open or 'secure'; this is where the gates are closed as standard, and open as a customer approaches. If another customer tries to exit the store in the wrong direction at the same time, the gates will close and an alarm will sound. We also supply manually operated gates where a lower level of security is sufficient.

Your self-service and automated technology specialists, providing happier, higher spending shoppers and lower operational costs.

Example Benefits

- ▶ **Improve security**
- ▶ **Improve customer flow**
- ▶ **Reduce loss**
 - Our automatic gates can be interfaced with a variety of control systems, from a simple manually operated push button to more sophisticated fully automatic ultrasonic or auto-sensor devices
 - Connection to a customer's own fire alarm or computer system is also possible, while a customer counting facility is also available.

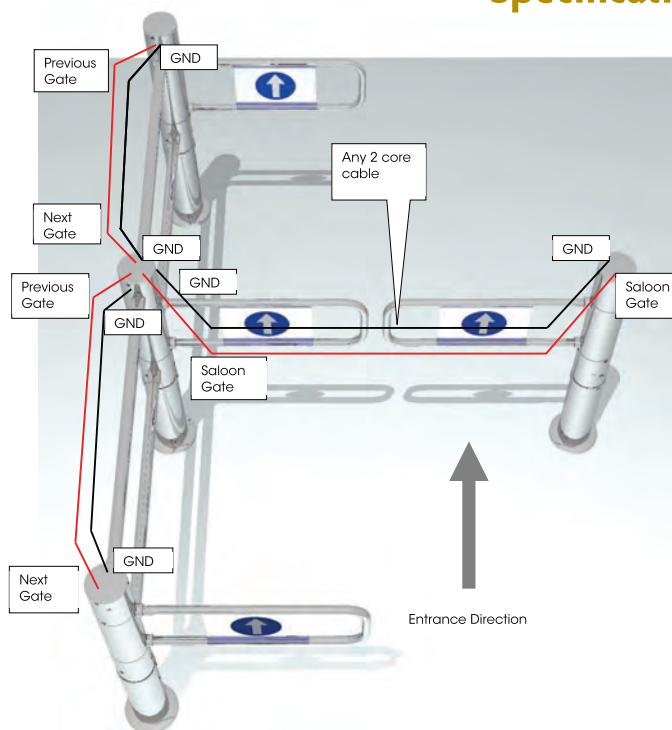

An effective visual & physical deterrent which improves customer flow to reduce store theft

LOSS PREVENTION: SECURE ENTRANCE

We have a wide range of standard secure entrance components, or we can provide you with a custom design if the standard range does not quite meet your requirements.

Get in touch with us to talk about your exact requirements and our friendly sales team will be happy to assist and guide you to ensure that you get the best solution for your needs.
