P&H Pinntec HWD

LOSS PREVENTION: **SECURE EXIT**

We have a range of automated solutions specifically designed for the checkout arena to reduce the growing threat of theft, including at self-checkout units.

The customer exit process can be controlled by a single-use barcode which is printed on the customer's receipt, with a bar-code scanner at the exit triggering the gate to open.

Use of exit solutions decrease the temptation for shoplifting as consumers are obliged to show proof of purchase and verification. Our range of exit solutions support verification of printed and mobile receipts, as well as a truly frictionless experience where no scanning of receipts is needed while maintaining the same security level.

Your self-service and automated technology specialists, providing happier, higher spending shoppers and lower operational costs.

Example Benefits

▸ **Reduce shoplifting**

▸ **Control customer flow**

▸ **+98% accuracy**

- Prevents security issues and reduces theft in manual and self-service checkout areas
- Avoids customer confusion caused by backflow
- Return on investment in as little as 7 months

Skimming from tills is most common in garden centre cafes

LOSS PREVENTION: **SECURE EXIT**

We have a wide range of standard secure exit components, or we can provide you with a custom design if the standard range does not quite meet your requirements.

Get in touch with us to talk about your exact requirements and our friendly sales team will be happy to assist and guide you to ensure that you get the best solution for your needs.
