

LOSS PREVENTION: SECURE FIXTURES

We have evolved smart drawers, vending and collection units, and intelligent doors to handle a wide range of high value and fragile products. Our smart drawers can securely enable shoppers to browse, select, pay and collect high value, vulnerable products on the sales floor.

Items within our units are only dispensed once they are paid for, meaning additional security tags are not needed.

Our aim is to display high value, high shrink goods at the lowest possible risk, while still enabling customers to browse and select without waiting for staff to unlock the product. We are leveraging the benefits of Automated Retail solutions to protect high shrink products while encouraging sales by allowing customer access to the products.

Your self-service and automated technology specialists, providing happier, higher spending shoppers and lower operational costs.
